Profile

I am a passionate and creative Full Stack Web Developer from Evangadi, United state ,with a strong commitment to delivering high-quality, responsive websites. My background in communication, project management, Mechanical Engineering and has provided a solid foundation for my transition into web development. I hold a B.Sc. in Mechanical Engineering in Addis Ababa Universty and have gained hands-on experience by replicating websites of industry giants like Apple, Netflix, Evangadi forum and Amazon. I thrive in team environments, consistently meeting deadlines while focusing on user experience and seamless interfaces.
